

SPOOL FRAME WITH SUPPORT CONES

58540 SERIES

The DCD Spool Frame is engineered for years of trouble free usage. While DCD offers this product for carrying our Pull Tapes, it can also be used for carrying data and communication cable drums.

It has an easy fold up frame that is convenient for carrying or storage and does not require removing the spool or the 1/2" dia. spool support bar.

After a recent customer request we designed the support cones, which prevents the spool from rocking during use, and provides increased stability for the unit.

TAPES AND TWINE

58500 SERIES

DCD partnered with A-D Technologies (Arncos) in handling a wide range of high performance Bull-Line™ Pull Tape products to expedite cable installation. Choose from woven polyester tape products which are available in a variety of strength and lengths. A single pull tape eliminates the additional labor required for string, rope or winch line combinations. All Bull-Line™ tape is manufactured with the Stiff-Tape™ lubricated coating, resulting in the highest performance pull table available in the industry. Whatever the choice, Bull-Line™ Pull Tapes have continually provided a superior alternative to plastic pull ropes in cable installations through all types of conduit. A-D Technologies Bull-Line™ Pull Tapes meet or exceed all pull line requirements of Bellcore GR-356-CORE. Polyester Bull-Line™ is the most economical pull tape, very strong and durable and the elongation at yield is about 12 to 15%. Detectable tape have a 22 gauge solid copper wire woven into the tape.
