Fiber Optic Drop cable Protection Box

The fiber optic drop cable protection box is a case to put over a cable with a thermal protection tube after hot melting, so that the splice spot can get better protection relative to the cold welding. The hot one can improve the performance of the connector, increasing the effective connection rate to one hundred percent and prolonging the service life of the product.

Features & Specifications

Applicable Fiber Diameter: 2.0/3.0/0.9/0.25(mm)

Size (LxW) 4" x 0.5" (103 x 12mm)

Weight: 0.005kg

Working Temperature:-40- 75

Service Lifetime: Over 10 Years

- Small size and good appearance
- Smooth body and convenient installation
- Mainly used as the protection between cables or pigtailed
- Reliable protection that avoids any breaking
