FIBER OPTIC

Raceway/Routing System

Fiber Raceway is an ideal solution in data centers, head ends, telecom rooms, and wiring closets. Larger capacity, which allows you to route higher cable counts and time-saving Raceway/Channel ensure that channels and fittings are efficiently assembled. And proper bend radius prevents deterioration or breakage of fiber optical cables.
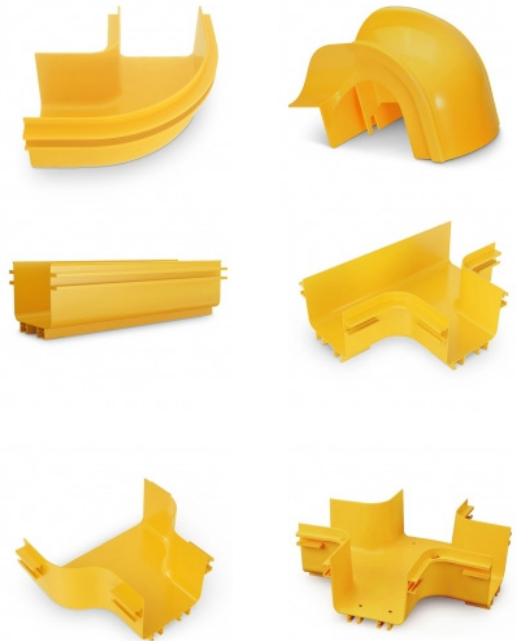

Features & Specifications

High Quality Flame Retardant Material

The flame retardent level exceeds UL94-V0 International Standard. Once ignited, it can be self-extinguishing within 1 second

Full Arc Design

All the Fiber Raceway Systems are designed in full arc, which can protect your fiber wire.

Easy For Installation

The cut surface is smooth and neat with exquisite design, matching with the screw, making it easy to assemble

Complete Parts and Sizes

A full range of fiber line slot products are availble, so customers can choose the appropriate configuration according to their own requirements.
