

FPR3SP

OPTICHANNEL™ Rack Mount Panel, 3 FSP Adapter Panels, Unloaded

FPR Rack Mount Panels occupy 1 rack unit and are ideal when conservation of rack space is required in a dense network environment. The hinged swing-out drawer is designed to reduce stress on the fiber and bend radius extremes when access to fiber connectors and cables is required. The 12- and 24-port FPR series pre-punched panels are available loaded or unloaded.
