

1. PRODUCT SUMMARY

The Primex Verge P4200 WiFi transparent Media Distribution Enclosure for structured wiring brings reliability when managing today's inside cable system requirements.

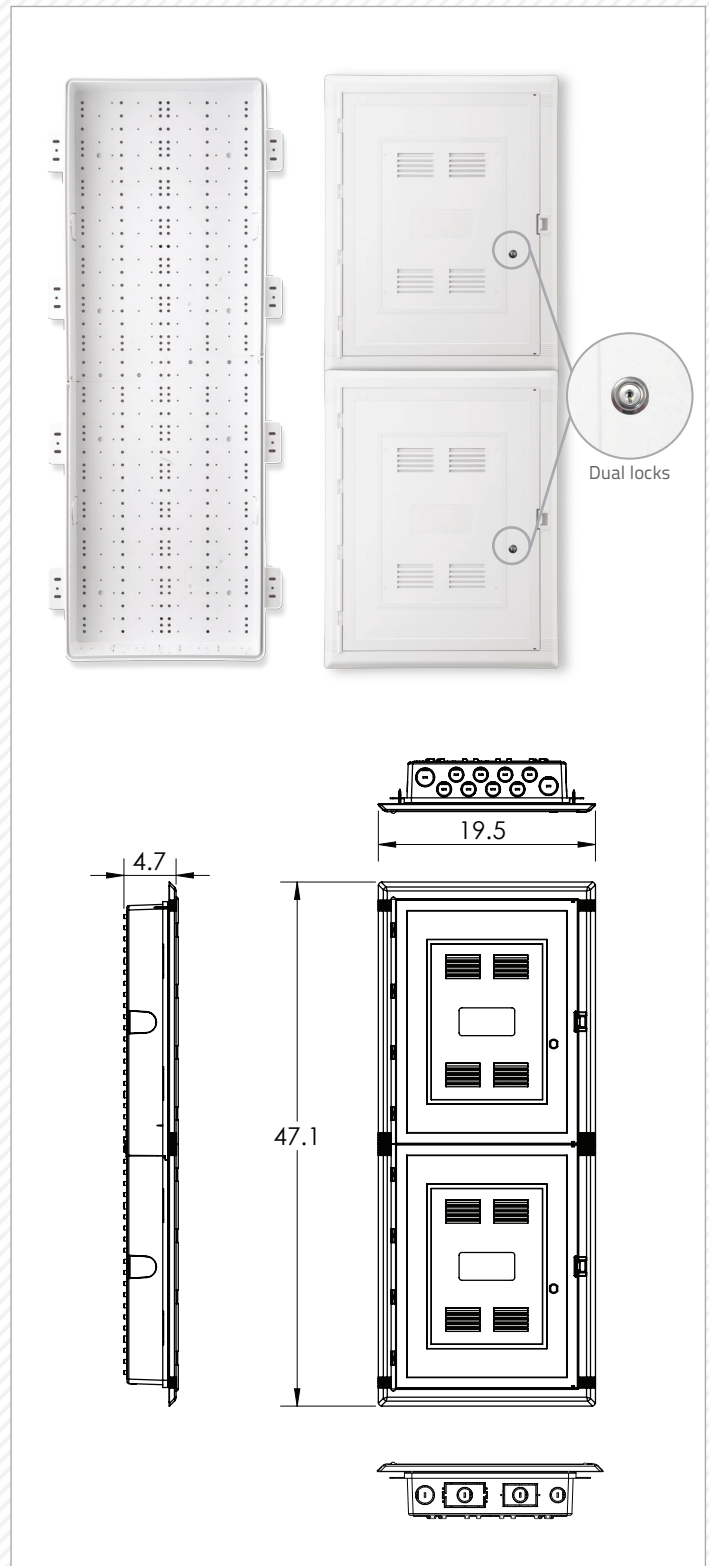

Its flexible design provides a convenient and centralized, lockable location for easy installation and distribution of multi-play services within residential and commercial premises.

2. PRODUCT DIMENSIONS

Inside H 42" /W: 14" /D: 3.5" (scalable in 21" increments)

3. FEATURES & BENEFITS

- One convenient and centralized location for easy installation and distribution of multi-play services.
- WiFi transparent plastic delivers up to 15 times more wireless signal strength than metal alternatives.
- Eliminate interference with equipment such as a router's wireless signal with ABS polymer construction.
- Easy installation and transportation with the lightweight design.
- Scalable in 21" increments (63", 84", and up)
- Multiple entry/exit knockouts on the sides, top, and bottom make them completely adaptable.
- Increase flexibility of installation with a mounting hole pattern.
- Secured via dual key locks: P/N:125-1064
- Assure safety and durability with UL safety standard compliance, ABS flame retardant polymer.
- These enclosures should not be installed in a fire rated wall as they are not fire rated.
