

Padimount

Padimount is a sleek, secure, and elegant docking solution for iPads. The ultra-thin, modern design boasts the thinnest profile of any in-wall tablet docking solution, extending a mere 3.6mm beyond the surface of the material it is mounted in. Need to mount the dock on top of a stud? No problem, thanks to Padimount's need to only sit in material half an inch thick. High-grade metal frames in a variety of finishes meet any interior design need and the secure in-wall mounting bracket allows the Padimount to be easily retrofittable. Add Padimount's optional POE injector and receiver to keep your iPads constantly charged at an industry leading 330 feet.
