

SLIM-Series

Soundbars that ROCK!

SLIM-Series

AUDIO

Sound that will impress. To bring out the sound in a soundbar this thin, we started from the ground up and engineered a cutting-edge design specifically for the SLIM:

- Using a solid, one-piece housing allowed us to maximize air volume and rigidity to achieve a full range of sound.
- Our three tweeters are 1 inch aluminum dome - not silk - with sophisticated crossover on the metal housing to give them a softer, warmer sound.
- All our six, 3.5 inch woofers are active – there are no passive woofers for needless show or added expense. Made from black carbon fiber – not poly – for greater output, our rigid, long-throw glass fiber cones and ported motor assemblies allow the drivers to deliver amazing separation and rich, full sound. Your customers will love the sound of SLIM!
